---

Jacquie,

As a follow up to our call this morning and an initial review of the data provided yesterday, we have prepared the following list of information that we do not believe we have received. We would appreciate receiving this data at your earliest convenience. There may be gaps, but this is what we identified since yesterday.

1. Locations/depth/hold time.

- a. It is not clear where the Hoxsey soil and water samples were collected. Does G103 and X103A correspond to GP-103? If not, where were the samples collected?
- b. We appreciate the sample depth information for the Hoxsey samples that we received this morning. We do not have information for any of the April 29, 2013 samples indicating the sample depth. We appear to have general location descriptions (for example – “Omni-excavation floor”) but if you could provide a map, GPS coordinates or other information to pinpoint the location that would be helpful.
- a. We would also like information related to location and depth for any samples collected but which exceeded the hold time.

2. May 22, 2013 TestAmerica Data Validation Report. We received three summary pages and pages 6-17 of 41 pages. We would like pages 18-41, and depending how the summary pages are counted (they are not numbered), pages 1-5.

3. Data.

- a. We do not believe we have received data for two soil samples listed on EPA’s soil sampling summary.
  - i. WGS-UST-072612; sample matrix – oil; product from removed UST
  - ii. WGS-S01-042213; sample matrix – soil; OmniTRAX – surface soil atop exposed UST
- b. We do not believe we have received data for water samples listed on EPA’s water sampling summary that were collected on the following dates.
  - i. 10/31/2012
  - ii. 11/5/2012
  - iii. 1/11/2013
  - iv. 2/12/2013
  - v. 2/19/2013
  - vi. 2/21/2013
  - vii. 4/22/2013
  - viii. 5/8/2013

This is just a preliminary list of data we do not believe we have, and we may supplement the list later after we have had more time to dig into the data.

Thanks.

Mark
